(54) Title: TIME-VARYING IMAGE EDITING METHOD AND TIME-VARYING IMAGE EDITING DEVICE

(54) 発明の名称 動画像編集方法および動画像編集装置

(57) Abstract

A time-varying image editing device is provided on a recording medium (101) and used for editing time-varying image data reproduced from a time-varying image file containing time-varying image data body (111) the items of which are arranged together with time management information in temporal order and outputted. The device includes a file-to-be-reproduced extracting section (12) for extracting a desired reproduction part of a time-varying image file. The desired part contains a predetermined reproduction time. The device further includes a file creating section (17) for storing edit information (112) for managing the extracted reproduction part and the reproduction time in an area other than the one where the time-varying image data body is stored on the recording medium (101).
